

PCR Primer Design Exercise - Evaluation

Thank you very much for taking part in our PCR and Primer design application demonstration. The feedback you give here will allow us to change and improve aspects of our system. This application is in a beta stage and will be changed before the final delivery. We will not be asking for any personal information, but anything you do write may be used to compile our final report. Thanks for your time.

1. Was it always clear what to do to progress in the application? If it wasn't at any stage, please explain your issues:
2. Aesthetically, did the application meet your demands and expectations? How could the visual aspect be improved?
3. Did you find the *Primer Design Rules* box to be a helpful summary of these rules? How could it be changed to provide more assistance?

4. If you used the primer rules provided at any time, did you find the information provided useful in re-attempting the problem, and were the rule infractions covered in enough detail?

5. Now that you have completed the application, do you feel your understanding of PCR and Primer techniques has improved?

6. Did you run into any technical issues with the application? If so, please describe them.

7. If you have any other comments you wish to make about the application or the demonstration, please enter them here.

Thank you very much for your feedback.
